Technical Project Manager with expertise in designing workflows, optimizing processes and managing technical integrations. Skilled in collaborating with development teams, combining technical knowledge with strong organizational abilities to deliver results.

Experience

Colmex Pro	Project Manager
Jan 2026 - Today	Managing cross-functional projects from initiation to delivery. Designing and implementing company-wide project management infrastructure using Monday.com. Establishing workflows, automation, and processes to standardize project execution across the organization. Building documentation and knowledge base to support system changes.
marios.evripidou.me	Project Manager
Jun 2024 - Dec 2025	Designed PMO infrastructure in Monday.com and JIRA with custom workflows for different project types across different industries. Reduced development backlog by 70 % through workflow redesign and prioritization. Streamlined requests, analysis, and handoff processes to development teams. Documented processes and procedures to support scaling.
PLUGIT	Project Manager
Oct 2020 - Feb 2023	Designed and implemented development workflow and client requests process. Created all technical documentation including product manuals, API documentation, and release changelogs. Worked with the development team to break down requirements and prioritize execution. Gathered and refined backlog requirements from account management, support, and sales teams.
PrimeXM	Head of Client Projects & Onboarding
Oct 2017 - Jan 2019	Designed and implemented the client onboarding process covering KYC, agreements, technical setup, training, and support. Optimized workflows and revamped the JIRA infrastructure with custom workflows and dashboards. Created the knowledge base covering all the processes. Collaborated with the development team on product enhancements.
Point Nine	Client Success Director - Project Manager / Business Analyst / Product Owner
Jan 2012 - Jun 2017	Designed and handled the client onboarding workflow. Analyzed client requirements, mapping them to our operations platform. Managed third-party integrations (custodians, prime brokers and fund administrators). Prepared specifications, documentation, and training materials. Coordinated implementation and testing with operations and development teams.
